

**Town of New Durham
Joint Loss Committee Meeting
June 4, 2021 at 2:00pm at
Town Hall Meeting Room
AGENDA**

Every employee has the right to a workplace free from occupational safety and health hazards.

A Joint Loss Management Program is designed to prevent accidents and illnesses, and is established jointly between employees and management. Unsafe act(s), unsafe condition(s) and accident(s) all demonstrate a weakness in the management system. This program provides the framework for safety to be managed like any other function through planning, organization, leadership, and control. It is an established fact that a well-trained, well-disciplined and well-supervised employee in a safe and healthful environment is less likely to have an accident.
